The Poincar Conjecture: In search of the shape of the universe Donal O'Shea. The Poincar conjecture is one of the few mathematical results that has managed to

[The Poincare Conjecture: In Search of the Shape of the ...](#)

The Poincar conjecture lies at the heart of modern geometry and topology, and even pertains to the possible shape of the universe. The conjecture states that there is only one shape possible for a finite universe in which every loop can be contracted to a single point.

[Bookslut | The Poincar Conjecture: In Search of the Shape ...](#)

The conjecture in question is a claim made by the mathematician Henri Poincare over 100 years ago. He said that all four dimensional spaces in which a loop in that space can be narrowed to a point are four-dimensional spheres -- there are no other possible shapes for the space. Until 2002, no one had been able to prove or disprove this claim.
